**Agenda Item #4 – Manager’s Report**

Per request of Chairman Robinson, Agenda Items #9 and #8 were moved up without objection. Chairman Robinson recognized Valerie Seidel of The Balmoral Group who provided options for the SEP and its implementation in light of recent discussions with RESTORE Council staff. The options included how the Consortium may address the timing of Conceptual Design & Feasibility Studies, the depth of project analysis needed for the SEP, the potential to accelerate the drafting of the SEP, how implementation funds may be distributed, the role of sequencing, and the option of a Mini-SEP to address certain financial and administrative needs. Following discussion, Mr. Yeager suggested a white paper detailing the options be created and made available for the meeting of the Directors next week. No action was required on this item.

---

**Agenda Item #5 – General Counsel’s Report**

Chairman Robinson recognized Lynn Hoshihara, who concurred with the analysis of the options described by the Manager. Ms. Hoshihara recommended that preparation of an RFQ for the Conceptual Design/Feasibility Studies be placed on hold until further direction by the Directors. No action was required on this item.

---

**Agenda Item #6 – SEP Project Management Report – Status Report on Work Order # 7**

Chairman Robinson recognized Doug Robison (ESA) who gave a detailed overview on the status of the work performed under Work Order #7 to date, including the conclusion of all county follow-up meetings. Mr. Robison summarized the meeting with RESTORE Council staff in New Orleans and recommended a level of detail for the SEP to be between that of Mississippi and Louisiana, which were both approved. He concurred that CD/FS work was not a requirement and proposed to accelerate the schedule by about 5 months, providing a pre-draft of the SEP in September, a complete draft at the November Meeting, public review during November and December and submittal to the Governor in January 2018, leading to RESTORE approval in March 2018. No action was required on this item.

Chairman Robinson recognized Doug Robison who gave a preview of Work Order # 8 which includes Task 9 – Conduct Project Leveraging Analysis and Task 10 – Develop Project Sequencing & Implementation Strategy. Chairman Robison recognized Lisa King (Langton & Associates) who stated that the sequencing was not required but was of value for each county to know when their money was coming in and how that money may be leveraged. Commissioner Neugent inquired about the creation of a revolving loan fund. Chairman Robinson indicated that the Consortium would have no control of the interest on the fund but saw the need to provide incentives for counties that waited for funds. Commissioner Mariano inquired about the distribution of the Triumph Gulf Coast money; Chairman Robinson indicated this was a legislative decision. The Executive Committee consensus was that sequencing was needed; Commissioner Constance requested that the Director’s meeting agenda be organized to address the issues discussed and Chairman Robinson agreed. No further action was required on this item.

---

**Agenda Item #9.1 – Planning Grant Update: Grant Management and Administration Report**

Chairman Grover Robinson recognized Lisa King who summarized the status of grant management. **Agenda Item 6A  
SEP Project Management Report on Work Order #7 – Complete the Draft  
Project List and Conduct Detailed Project Evaluation and Refinement**

**Background:**

At its April 6, 2017 meeting the Gulf Consortium authorized Work Order #7 which involves the completion of the Draft Project List, and conducting Conduct detailed project evaluation and refinement. This work has been initiated and will continue through August 2017.

**Update:**

It is anticipated that all 23 County Commissions will have taken formal action approving their respective projects prior to the June 28, 2017 Gulf Consortium meeting in West Palm Beach.

Over the next several months the ESA consultant team will work closely with each of the counties to evaluate and further refine their projects. The goals of this effort are to:

- Identify fatal flaws;
- Determine feasibility;
  - Permit-ability
  - Constructability
  - Affordability
  - Public support
- Estimate cost.

This will involve information exchange between the consultant team and county staff through several teleconferences and/or in person meetings with each county. This work effort has just begun, and progress will be reported on in subsequent meetings.

The ESA consultant team is also developing a table of contents for the Draft State Expenditure Plan document, and a standard template for all project descriptions to be included in the SEP. These materials will be presented by Mr. Robison at the June 27, 2017 Gulf Consortium meeting.

#### **UPDATE: Work Order # 8 - Conduct Project Leveraging Analysis and Develop Project Sequencing & Implementation Strategy**

##### **Background:**

At its April 6, 2017 Gulf Consortium meeting, Doug Robison presented a preview of Work Order #8 which authorizes the Consultant to complete Tasks 9 and 10 of the amended State Expenditure Plan development process. These tasks include:

- Task 9 - Conduct Project Leveraging Analysis;
- Task 10 - Develop Project Sequencing & Implementation Strategy.

The goals of these tasks are to maximize leveraged funding sources for all SEP projects, and to develop a project sequencing schedule and implementation strategy that optimizes the 15-year payout such that each county is annually making progress on their respective projects, while also ensuring that priority early action projects can be adequately funded.

Task 9 will include the production of an *Other Grants Inventory* (OGI) document, coordination with Restoration Council and FDEP staff as to funding from other RESTORE funding sources (as well as other governmental and NGO funders), and linking individual projects with leveraging sources. Leveraging will allow the State Expenditure Plan to expand beyond the Spill Impact Component funding levels, an important consideration given the different stages of project readiness and long-term payout. Leveraging will also allow for more flexibility if projects become more expensive than anticipate and will raise the overall impact and investment to the Gulf Coast of Florida.

Task 10 will develop scenarios of sequencing projects based on project readiness and the timing and availability of leveraging. These scenarios will keep all counties moving forward on their projects. With the “even-steven” approach and long term payout this task is crucial to successful SEP development and a smooth transition into the implementation phase so that the money can begin flowing to projects. Unlike other States, Florida must have a well-developed expenditure plan. Other states have more flexibility to drop suites of projects if funding requirements change. Florida’s SEP must be developed enough to insure the “even-steven” policy is adhered to while being flexible enough to deal with inevitable changes in needs, priorities and policies over a 15-year horizon.

Completion of Tasks 9 and 10 will close out Phase III – Project Evaluation of the SEP development process and set the stage for the development of the draft SEP document on an accelerated timeframe.

The Gulf Consortium Board of Directors approved Work Order #8 on May 11, 2017.

**UPDATE:**

Task 9 - Langton Consulting has developed the database for the Other Grant Inventory (OGI) and begun document researching and documenting various funding opportunities that will be summarized and cataloged in the inventory. A DRAFT Funding Opportunity Summary Sheet is attached.

Task 10 – Integral to this task is the development of an accounting system called the Allocation Tracking System (ATS) to track the timing of Florida's total allocation under Pot 3 and how that will influence the sequencing of County projects. Taking this information into account the Consultant team will then develop various sequencing models for the Gulf Consortium Board of Directors to discuss and make a selection. An ATS Framework document outlining the total allocation to Florida is attached.

Agenda Item #9

# Initial (“Mini”) SEP and Implementation Options

Manager’s Report

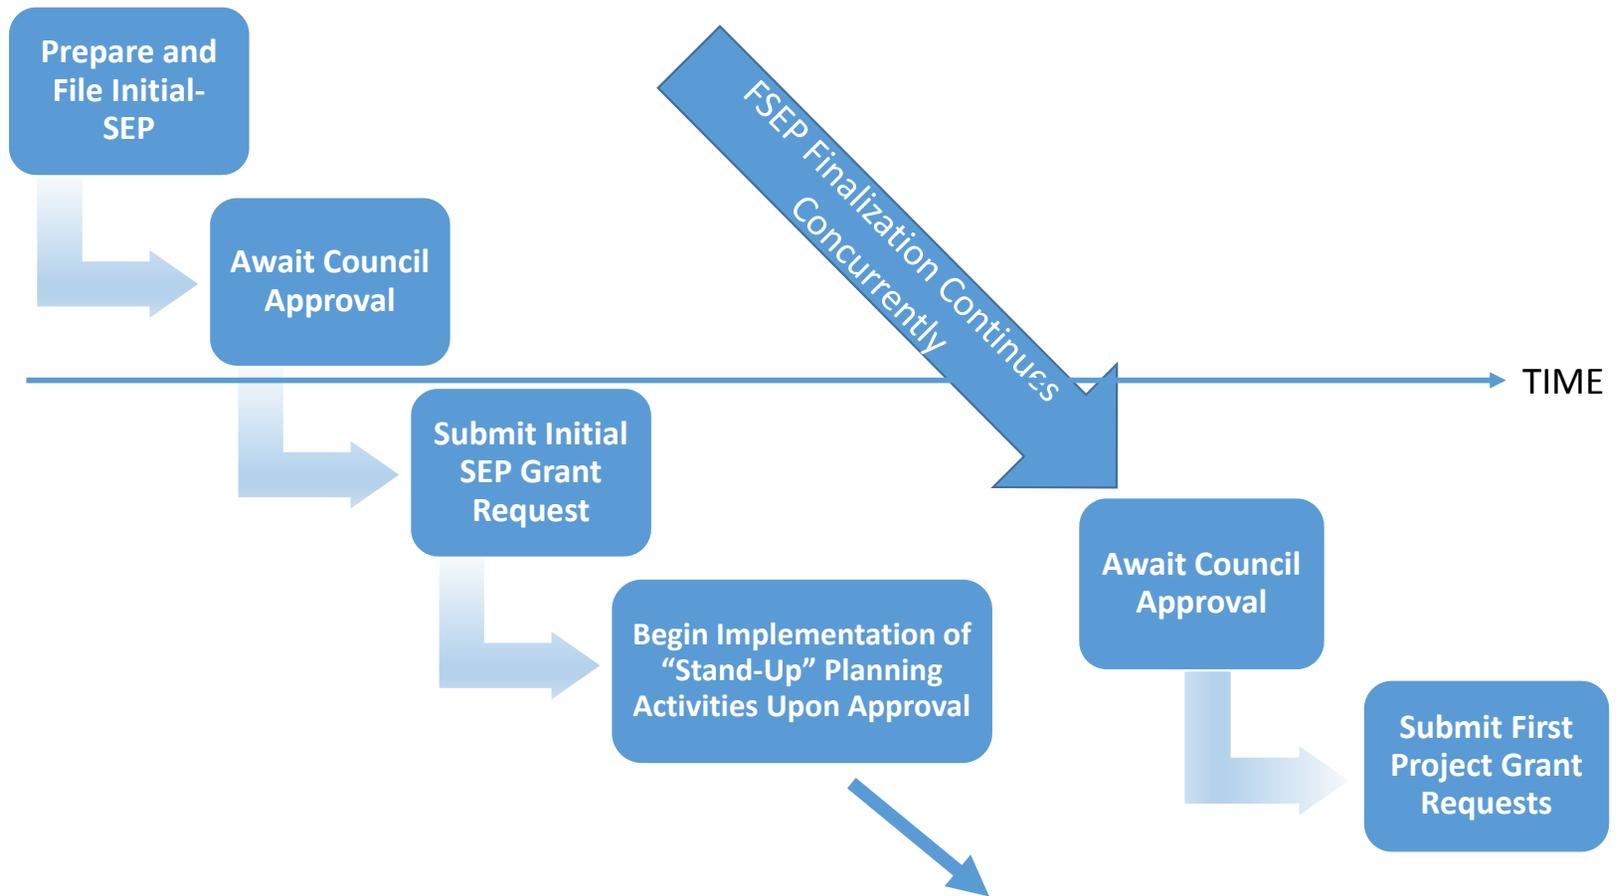

# SEP Implementation Options

## Option 1 (First Project)

# SEP Implementation Options

## Option 2 (Initial / "Mini")

## SEP Implementation

- Pros of Option 1 (1<sup>st</sup> Project):
  - Single, Comprehensive SEP for Florida
  - Scope to be developed within the existing Planning Grant
- Cons of Option 1:
  - Administrative & Financial Structure would need to be the first implementation grant project
  - May delay FSEP grant request approvals prior to implementation while Administrative & Financial processes are approved by RESTORE Council
- Pros of Option 2 (“Mini”):
  - Establishes Administrative & Financial Architecture up-front for all future project grants
  - **May** be funded with existing Planning Grant (per RESTORE Council)
  - General FSEP may proceed while “mini-SEP” is being implemented
  - Shortens Overall Schedule; Allows all counties to begin implementation upon FSEP approval
- Cons of Option 2:
  - Submittal of Initial SEP still requires FSEP-level documentation
  - Development in-House or potentially outside of current Planning Grant

## SEP Implementation Schedule

- Option 1 (1<sup>st</sup> Project):
  - As part of Draft FSEP, September 2017
  - As part of Final FSEP, November 2017
  - As part of Approved FSEP, March 2018
  - Assume two months to implement if entirely in-house (May 2018)
  - 3-4 months to implement if done externally via contract (June 2018)
- Option 2 (“Mini”):
  - As stand-alone submittal, September 2017
  - As approved by Council, January 2018
  - Assume two months to implement if entirely in-house (March 2018)
  - Counties to begin implementation grants and pre-award activities upon FSEP approval (April 2018)
